

AI-Lung-Diagnostics

Business Problem :-

1. **Survival Trends**

- What % of patients survived?

2. **Comorbidities & Survival**

- How do Hypertension, Asthma, Cirrhosis, Other Cancer, Cholesterol level affect survival?

3. **Treatment Effectiveness**

- Which Treatment Type has better survival outcomes?

4. **Demographics**

- Patient distribution by Gender, Country, BMI Group.

5. **Timeline**

- How long do treatments last? Any trends by Cancer Stage or Treatment Type?
